

For all your metal recycling needs

JMC Recycling Systems

The JMC Mobile Crusher

Part of The JMC Range of Demolition Equipment!

The IF Range of crushers has been designed to meet the ever growing demands of the demolition industry. The combination of power and versatility allows these crushers to handle anything the demolition market can throw at them. They can handle re-inforced cement constructions and can be adapted to be used for the reduction and separation of materials.

Hardwearing and Built to Last!

Built completely with Hardox and Weldox these crushers will not wear easily!

The IF Crushers all have 360° rotation allowing equipment to be positioned precisely and therefore the moving and crushing of the demolition scrap is quick and easy.

Speed is also an added bonus in the IF line, each cylinder has an acceleration valve which guarantees a rapid work cycle.

And in this day and age security is always a factor, and you can rest easy knowing the IF Crushers are fitted with anti-intrusion protection.
