

JMC RECYCLING SYSTEMS

For all your metal recycling needs

JMC Minibale 500 RDI System

The Minibale RDI can baler has been designed specifically as a low-volume can collector able to handle 500kg per day and an inexpensive way to help make can collection pay. Totally automatic, so the only requirement is a feed of material, and once started you can walk away and attend to other aspects of your business.

The Minibale will crush and lock cans together to make dense cubes which require no tying or strapping. The bales are simply ejected from the machine ready for transportation.

The machine can be operated with an RDI sorting system to give complete separation of aluminium from steel cans, thereby ensuring the maximum possible return from your metal, with the lowest possible financial outlay on equipment.

Technical Data

Capacity:	Up to 110kg/hr
Bale Size:	164mm x 164mm, 6.4" x 6.4"
Motor:	1.5kW, 2Hp
Weight:	930kg
Length:	2103mm, 83"
Width:	552mm, 22"
Height:	1608mm, 64"
