

VIKING - Cable Granulation System

NEW

Handles wires and cables at rates of up to 1000kg/hour

Excellent separation of metals from plastics

Compact, needing minimum floor space

Wet and dry systems available

Produces clean copper granules from your scrap wire and cable

Unlike most other equipment available on the market, VIKING is not a toy but a heavy industrial machine for producing clean copper granules from all types of household cable and other small wire. The cable can be fed directly into the hopper of the machine in lengths of 500 to 1000mm, or in rings of 300mm diameter. The cable is first processed through a granulation system and the resulting granules transported to a separation unit via a blower system. Separation of metals and plastics takes place on a vibrating dry separator. Systems can be combined with the Wagner range of pre-shredders.

VIKING - Cable Granulation System

Technical Specification

Model (Dry)	Production (Kg/Hr)	Power (KW)	Sorter	Cable Type	Rotor Size (mm)	Total Electrics
JMC VIKING 2D	150-200	15	JMC DRY	Mixed	350 x 500	22.6
JMC VIKING 4D	200-300	18.5	JMC DRY	Mixed	350 x 600	26.6
JMC VIKING 6D	400-600	22	JMC DRY	Mixed	400 x 600	32
JMC VIKING 8D	600-700	30	JMC DRY	Mixed	400 x 800	45.5
Model (Wet)						
JMC VIKING 2W	150-250	15	JMC WET	Mixed/Fine	350 x 500	20
JMC VIKING 4W	250-350	18.5	JMC WET	Mixed/Fine	350 x 600	23.5
JMC VIKING 6W	350-450	32.5	JMC WET	Mixed/Fine	400 x 800	38

Blade Configuration 2x Rows Fixed, 3x Rows Mobile (2x Knives on 1x Row)
 Water Requirement on Wet System 400 Litre

Also available from JMC:

Shears

Can Sorters

Ingot Casting

Cable Strippers

Shredders

Dross Processing

Non-Ferrous Balers

Steel Balers

Drum Crushers

Grabs

Granulators

Tyre Crushers

Magnets

Hydraulic Cutters

Pneumatic Cutters
