## TYRE DISMANTLER

### WRD 850

The no fuss, cost effective solution to separating the rims and tyres from car wheels.

#### Meet the WRD 450's big brother, the WRD 850.

It does the same job as the 450 and has 3 cylinders but with more power and a bigger capacity. The WRD 850 has a driving power of 22 kW and will take tyres up to 830mm.

The tyre is placed in the middle of the three rams which are then forced into the tyre crushing, crushing the rim. The rams then retract and the rim is pulled from the centre of the tyre with ease.

Crushes up to **120** tyres per hour.

Tyres crushed in **15** seconds.

**32** tonnes of power per cylinder.

#### Technical Data

Length:	2,8m
Depth:	2,1m
Height:	1,8m
Driving power:	22 kW; 400V/50Hz
Max. tyre:	Ø 830mm
Weight:	approx. 2.500 kg
