

# JMC RECYCLING SYSTEMS

For all your metal recycling needs

## THE CAT SHACK

The CAT Shack is designed to provide a safe and efficient working environment for the processing of Catalytic Converters. Together with a JMC CAT Shear it allows the opening and separation of the contents of the catalytic converter together with a Dust Extractor unit that not only protects the operator but also maximises the retrieval of precious metals found in catalytic convertors.

The system incorporates a screw conveyor which transports the material from the shear into a collection bag and an extra addition of a hand-help vacuum attachment which allows the operator to clean down the shear and surrounding area minimising loss of product.

The CAT Shack is a simple system, easy to use and effective at maximising product retrieval as well as increasing throughput. Due to its simplicity the CAT Shack is robust and durable.

The CAT Shack is completely compatible with either JMC 407 or 500 CAT Shears.

### Machine Dimensions

<b>Width:</b>	<b>4.0m</b>
<b>Depth:</b>	<b>3.65m</b>
<b>Height:</b>	<b>3.2m</b>

*Overall dimensions are approximate sizes only*
